

TLF

Heavy Duty Flail Mower For Larger Skid Steer Loader

Optional hydraulic hoses are available from Needham Ag

The TLF series is a heavy duty flail mower designed to mow and mulch grass, brush and small trees up to around 2-3" in diameter. They are a preferred design compared to rotary cutters, as they don't propel material everywhere.

The TLF mowers are designed for larger skid steer loaders, with ideally 70-100 hp, with high-flow (see chart below for auxiliary flow requirements per minute). Skid-steers with higher flow (more than the flail mower requires), will need flow control on the machine.

Model	Overall Width (inches)	Cutting Width (inches)	Weight (lb)	Rotor Speed (RPM)	Required Oil Flow (gal/min)	Oil Pressure (PSI)	# Of Flails	# Of Drive Belts	Price \$
TLF 160	69	64	1280	2000	24-32	3200-4000	11	4	10,950
TLF 180	77	72	1390	2000	26-34	3200-4000	12	4	11,250
TLF 200	83	79	1500	2000	30-37	3200-4000	13	4	11,650

Standard Equipment

- Skid Steer Hookup Plate
- Electronically Balanced, Heavy Duty Rotor With Flails
- Heavy Duty, Adjustable Steel Roller With Scrapers
- Lateral Skids
- Rubber Flaps And Chains To Help Control Flying Debris.
- Mulching Teeth On Inside Of Housing
- High Quality Paint

Options

Oscillating Saddle

The oscillating saddle is highly recommended if you plan to mow a lot of grass on undulating surfaces, because it allows the flail mower to follow the ground contours MUCH better. It weighs 200 lb.

1920

Reinforced Flail Brackets

The reinforced flail brackets add to the strength of the supports, especially when chopping lots of larger material.
