

TLF

Heavy Duty Flail Mower For Larger Skid Steer Loader

Optional hydraulic hoses are available from Needham Ag

The TLF series is a heavy duty flail mower designed to mow and mulch grass, brush and small trees up to around 2-3" in diameter.

They are a preferred design compared to rotary cutters, as they don't sling projectiles everywhere, plus they mulch material much finer.

The TLF mowers are designed for larger skid steer loaders, with ideally 60-90 hp, with 20-28 GPM of auxiliary flow (see chart below for specific requirements). Skid-steer loaders with higher flow (more than the flail mower requires), will need flow controlled on the machine.

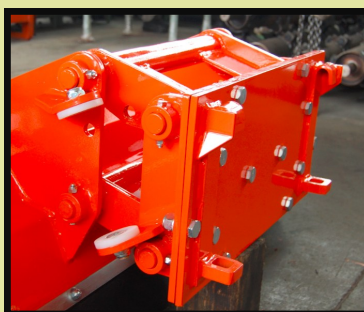

Model	Overall Width (inches)	Cutting Width (inches)	Weight (lb)	Rotor Speed (RPM)	Required Oil Flow (gal/min)	Oil Pressure (PSI)	# Of Flails	# Of Drive Belts	Price \$
TLF 180	77	72	1390	2200	20-24	3200-4000	12	4	13,890
TLF 200	83	79	1500	2200	20-24	3200-4000	13	4	14,590

Standard Equipment

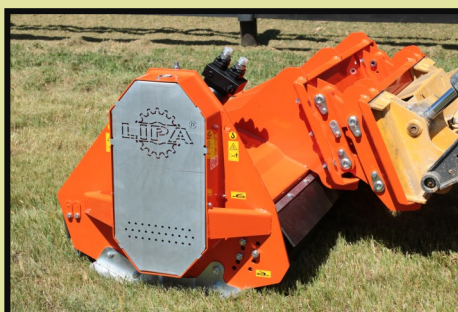

- Skid Steer Hookup Plate
- Electronically Balanced, Heavy Duty Rotor With Tri-Tooth Flails
- Heavy Duty, Adjustable Steel Roller With Scraper
- Lateral Skids
- Rubber Flaps And Chains To Help Control Flying Debris.
- Steel Counter Knives Inside Of Housing For Improved Mulching
- High Quality Paint

Options

Oscillating Saddle

The oscillating saddle is highly recommended if you plan to mow a lot of grass on undulating surfaces, because it allows the flail mower to follow the ground contours MUCH better. It weighs 200 lb.
